

Welsh Election Study 2001 (Wales Life and Times Study 2001)

NOTE FOR USERS

This note provides information in brief about the survey. It accompanies the final version of the main datafile (wes01.por). For further details about the survey, see Thomson. K. et al (forthcoming), Welsh Election Study (Wales Life and Times Study), 2001: Technical Report, London: National Centre for Social Research.

About the survey

The Welsh Election Study was carried out in co-operation between Richard Wyn Jones and Dafydd Trystan from the University of Wales, Aberystwyth, Anthony Heath of the Department of Sociology, University of Oxford, and the National Centre for Social Research. It was funded by the Economic and Social Research Council under the Devolution and Constitutional Change Programme (grant number L219 25 2042). The survey was part of a programme of surveys in England, Scotland, Wales and Northern Ireland in 2001 and 2003 – all funded by the ESRC – and co-ordinated by the Centre for Research into Elections and Social Trends. In the other parts of the United Kingdom the questions were carried as modules on the British Social Attitudes, Scottish Social Attitudes and Northern Ireland Life and Times surveys.

The survey was designed to yield a representative sample of the population in Wales aged 18+. The sample of addresses was drawn from the Postcode Address File. At each address, the interviewer established how many occupied dwelling units it contained. If there were several, one was selected at random for interview (using a Kish grid and random numbers). The interviewer then established how many adults aged 18+ lived in the (selected) dwelling unit. If there were several, one adult was selected (using a similar procedure as that used for dwelling units). The unequal selection probabilities arising from these procedures are taken into account by the weighting.

The fieldwork was conducted by NatCen. Interviews were conducted in the respondent's home, using a laptop computer. The questionnaire was translated into Wales. Respondents who preferred to conduct the interview in Welsh were interviewed over the telephone. The survey was known in the field as the 2001 Wales Life and Times Study.

Fieldwork was carried out between June and September 2001. A summary of the response is as follows:

Issued addresses 1,760
Of which in scope¹ 1,582

Productive interviews 1,085 (69%)

The data file should be used in conjunction with the following documentation:

- Documentation of the Blaise questionnaire program (final version dated July 2002)
- Question listing in Welsh
- Showcards (in English and Welsh)
- Scale sheet (in English and Welsh)
- Self-completion (in English and Welsh)
- Address Record Forms

Weighting

The main dataset (in common with all surveys based on samples from the Postcode Address File) must be weighted to take account of differing selection probabilities. Simplifying slightly: households are selected with equal probability, but only one person in each household is interviewed. People in small households therefore have a higher probability of selection than people in large households and the weighting corrects for this.

Please note that the data must be weighted in all analysis. The file is *not* preweighted. Before running any analysis, please use the following SPSS command:

weight by wtfactor

(or similar, depending on the exact syntax of your version of SPSS).

DOCUMENTATION OF THE BLAISE QUESTIONNAIRE

Notes:

- 1. This is a documentation of the Blaise program. Not all variables that appear here are on the SPSS file. (Those that are not are marked with a '\$'). Similarly, not all derived variables that are on the SPSS file are mentioned here. See also separate documentation of derived variables.
- 2. Unless otherwise specified, 'Don't Know' is code 8 for single column questions, code 98 for two column questions, and so on.
- 3. Unless otherwise specified, 'Refusal/Not answered' is code 9 for single column questions, code 99 for two column questions, and so on. Where there is an explicit 'Refusal' code (usually code 7 or 97), then code 9 (or 99 and so on) is reserved for 'Not answered' only.
- 4. Sections in brackets and italics were textfilled as appropriate on the interviewer's computer.
- 5. Routeing instructions appear above the questions. A routeing instruction should be considered to stay in force until the next routeing instruction.
